SECTION 1 - EXECUTIVE SUMMARY

The 2012 float season was fairly typical, both in terms of visitor use as well as river flows. A total of 4,714 floaters ranked 2012 as the 5th highest year in terms of total use. Visitor use during the early season months of April – May was average to below average, while June experienced the 2nd highest use on record with 2,185 floaters. An abrupt drop in river flows by the 3rd week in July ended the month with just under 900 floaters, the lowest number since 2007. The river peaked on June 06 with a mean daily flow 1,250 cfs. The lowest mean daily flow was recorded on August 08 at 62 cfs.

A record number 6,156 private launch applications were received for the 2012 float season, a 9.3% increase from the 5,633 applications received in 2011. This was also the first time the number of applicants exceeded 6,000. A total of 567 private groups floated the Smith River, involving 3,962 individual floaters, compared to the 20-year average of private use of 539 groups, with 3,346 people. Private permitted floats accounted for 84% of total floaters and 86% of total groups.

The 8 authorized commercial outfitting companies conducted a total of 43 trips involving 504 floaters (including both clients and guides), as compared to the 20-year average of outfitted use of 48 groups per year with 558 people. Outfitted floats accounted for 11% of total floaters and 7% of total groups.

The qualitative social indicator which measures satisfaction levels related to “encounters with other boats while floating the river” is the basis for assessing floater satisfaction with the *overall* level of solitude on the Smith River. 94% of the floaters fell into the range of “Neutral to Liked Very Much.” The threshold at which responses begin to near the “Neutral to Disliked” range began when floaters encountered between 3 and 5 boats per hour. However, the average responses scored between 3.18 and 3.21 (Neutral to Liked Somewhat) when encountering with 3 to 5 boats per hour. These results are a strong indication of high floater satisfaction with the overall level of solitude.

Special Projects Completed

The following special projects were accomplished in 2012:

Camp Baker

- Access road into Camp Baker was re-graded, re-shaped and re-filled with gravel. A gravel apron was placed and packed at the entrance to the parking area.
- Painted the interior walls and floor as well as the doors of both vault toilets.
- Applied a clear concrete sealer to the exterior walls and roof of both vault toilets.
- Installed a blanket wrap around the water heater in the ranger house.
- Removed outdated “Illegal Outfitting” signs. May replace them with updated version in the future.
- Repaired sewer line that had been damaged by fiber optic contractor.

Eden Bridge

- Installed animal resistant aluminum recycling containers.
- Installed display board for Smith River t-shirt sales.
- Installed portable, above-ground 450 gallon water tank at host site.

River Corridor

- 31 pit latrines were dug. 227 pit latrines have been dug in past 7 years. Seven year average is 32 pit latrines dug per year.
- Smith River Habitat Project (SRHP) members, in cooperation with personnel from the Whitehall Project, made approximately 200 releases of 300,000 flea beetles (Leafy Spurge beetles) between Bear Gulch boat camp and Eden Bridge.
- Smith River Habitat Project (SRHP) members performed 6th annual fall weed spray within boat camps and private land. 45.5 acres were sprayed between Cow Coulee and Paradise Bend Boat Camps.

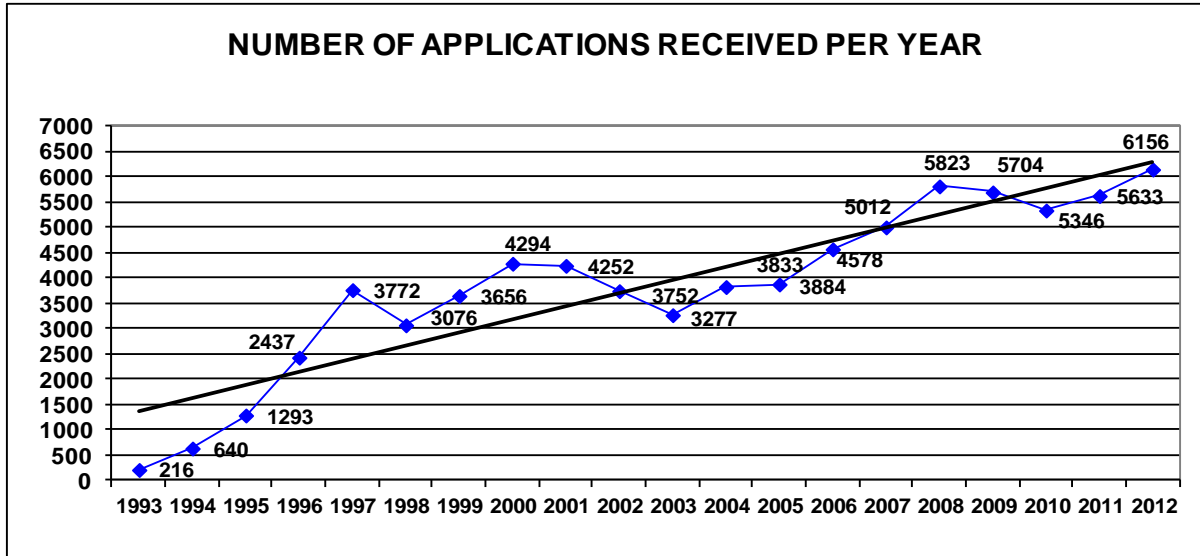

Administrative and Management Actions

- The new Region 4 Park Warden position was filled by Josh Stoudt. Stoudt successfully completed MLEA Basic 146 and FTEP field training. Stoudt will function as the Park Warden River Ranger in future years during the Smith River State Park float season.
- USFS funded a river ranger position for the 4th consecutive year. In 2012, the USFS Ranger worked the same schedule as the FWP rangers and performed all the Camp Baker administrative duties as well as the river patrol duties.
- R-4 State Parks was awarded a Recreational Trails Project (RTP) Grant which is used to fund one of the two seasonal river ranger positions during the 2012 and 2013 seasons.
- Smith River T-Shirt designed and sold at Camp Baker and Eden Bridge.
- Smith River State Park Biennial Rule updated and adopted by FWP Commission.

SECTION 4 – RESOURCE AND SOCIAL CONDITIONS

River Flows

The lowest measured stream flow for the 2012 season was 62 cfs (August 08), while the peak stream flow was 1,250 cfs (June 06). *High/Low flows represented as daily mean values.*

Indicator and Standard

Beginning in 2010, FWP implemented the new social indicator of encounters with other boats while on the river. This indicator has become the basis for assessing floater satisfaction with the overall level of solitude. The corresponding standard, that defines the appropriate satisfaction level with solitude, has not yet been determined.
